

MATCHING GEAR SHIFT KNOB – INSTALLATION INSTRUCTIONS FOR 13/18 CONFIGURATION

Includes Cover & Logo Medallion Only

After installation. (**Note:** Valve Assembly & Base Cover are **not** included)

Remove cover medallion.

Remove 2 screws and set them aside to reuse.

While holding splitter valve down (so that springs and ball bearing remain), remove original cover.

While still holding splitter valve down, press on new cover.

Replace 2 screws.

Gently press in enclosed logo medallion that is included with new SCI gear shift knob.

**Note:** if user desires to use their own medallion, the side ridges need to be filed/sanded down to insert into the new gear shift knob. See photo below.
