

# Hood Skinz

## WHAT ARE HOOD SKINZ?

Hood Skinz are a low-friction sleeve, handcrafted in the USA, to fit the upper hood supports of your Peterbilt 365, 367, 378, 379, 384, 386, 388, and 389 models.

## HOW LONG DO THEY LAST?

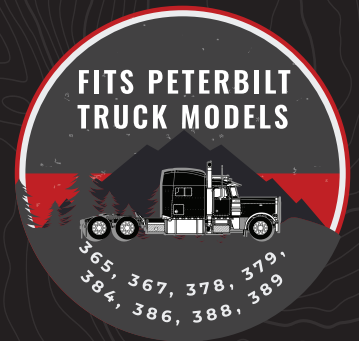

Hood Skinz are crafted and tested to last 25k to 30k miles. That said, there are many variables, including the condition of the rollers and guides, alignment of hood supports, etc. We have many happy customers with hoods that are in good shape that get 40k to 50k out of a pair. We believe it is a very good bet that four pairs will last most trucks at least a year.

AVAILABLE COLORS:

## STRETCH EM ON, THE SQUEAK IS GONE

Stretch Hood Skinz over upper hood support on each side of firewall.
